

# Professional Development Opportunities in Educational Technology and Education

(Formerly Educational Technology and Education Conferences)

For November 18, 2024 to June 2025, Edition #52

Prepared by Clayton R. Wright, crwr77 at gmail .com, November 15, 2024

The 52<sup>nd</sup> edition contains **selected professional development opportunities** that primarily focus on the use of technology in educational settings and on teaching, learning, and educational administration. Only listings until June 2025 are most complete as dates, locations, or Internet addresses (URLs) were not available for a number of events held after that date.

A significant challenge during the assembly of this list is incomplete or **conflicting information on websites** and the **lack of a link between conference websites from one year to the next**.

An explanation for the content and format of the list can be found at <http://newsletter.alt.ac.uk/2011/08/why-distribute-documents-in-ms-word-or-openoffice-for-an-international-audience/>. A *Word* or an *OpenOffice* format is used to enable people with limited or high-cost Internet access to find a professional development opportunity that is congruent with their interests or obtain abstracts or event proceedings. Consider using the "Find" tool under Microsoft *Word's* "Edit" tab or similar tab in *OpenOffice* to locate the name of a particular event, association, city, or country. If you enter the country "Australia" or place, such as "Vancouver" in the "Find" tool, all events that occur in Australia or Vancouver will be highlighted. However, note that there is a Vancouver in Canada and a Vancouver in Washington State, 450 km south of the Canada/USA border. Or, enter the word "artificial intelligence" or "AI". (Note that key words such as "artificial intelligence" or "AI" may not be present in the conference title, yet these topics could be discussed during a particular conference.) Then, "cut and paste" a list of suitable events for your colleagues.

Please note that **events, dates, titles, and locations may change** and **some events may be cancelled**. Thus, **CHECK the specific event website** not only for basic information, but to **assure yourself that the event is legitimate**. Some events are not quality-focused. I genuinely try to compile a list of events that will give you value for your time and money. But I may not always succeed. Take the time to **conduct your own due diligence** for any events you want to attend or submit a paper to. You could consider using the checklists at **Think Check Attend**, <https://thinkcheckattend.org/> which "aims to guide and assist researchers and scholars to judge the legitimacy and academic credentials of conferences in order to help them decide whether to or not attend the same". Also, you may want to refer to "[How to Make the Most of an Academic Conference](#)" by Thomas J. Tobin.

**All Web addresses were verified** at the time of publication. **No liability is assumed for any errors that may have been introduced inadvertently** during the assembly of this **FREE** list of events. Kindly retain the contact information when you re-distribute the list or mount it on the web as that is how I receive notices of future events. [crw](mailto:crw)
